Professional Summary

UX and front-end engineer with approximately 2.5 years of combined professional experience at WSO2, complemented by postgraduate HCI research in VR, automotive interaction, and intelligent systems. Translates user and research requirements into accessible production interfaces and interactive prototypes using JavaScript, TypeScript, HTML, CSS, Figma, Unity, and C#.

Core Competencies

Accessible front-end development; UX engineering and interaction design; responsive interfaces; information architecture; user research and usability evaluation; Unity/XR prototyping; automotive HMI and human factors; experimental-system development; structured data collection; cross-functional collaboration.

Professional Experience

Front-End Engineer Nov 2021 – Nov 2023
WSO2

- Developed responsive and accessible interfaces, landing pages, websites, and marketing platforms using HTML, CSS, JavaScript, jQuery, and Bootstrap.
- Designed and prototyped user-centered web and email experiences in Figma and Adobe XD, translating marketing and product requirements into implementable interfaces.
- Contributed to large-scale website and portal redesigns through information architecture, UI design, reusable frontend implementation, and usability-oriented improvements.
- Applied A/B testing and behavioral analytics using Hotjar, GA4, and Pardot, and collaborated across design, engineering, and marketing teams in an agile environment.
- Recognition: Top 5% Global in the 2022 H1 WSO2 Performance Review and Top 20% Global in 2022 H2.

Marketing Design Intern May 2021 – Sep 2021
WSO2

- Created reusable design assets and icon libraries and developed mobile-friendly email templates with consistent interaction patterns and visual hierarchy.

University and Technical Experience

Student Assistant May 2026 – Present
Ulm University, Executive Support Unit: Quality Development, Reporting and Revision

- Develop and maintain TYPO3 pages and contribute to Python-based automation, data preparation, validation, and reporting workflows.

Student Assistant – Marketing Oct 2025 – Present
Ulm University, Central Student Advisory Service

- Design and maintain student-facing TYPO3 pages, improving information architecture, readability, user journeys, and bilingual institutional content.

Student Assistant – Web Development May 2024 – Present
University Hospital Ulm, MOCA Lab

- Maintain research-related WordPress and TYPO3 websites and improve responsive layout, performance, and alignment with research communication goals.

Student Assistant – Web Development Jan 2025 – Dec 2025
Ulm University, i3R Center

- Developed accessible TYPO3 pages and frontend components for research and institutional communication, focusing on usability and performance.

Selected HCI, Unity, and Research Projects

Vehicle Motion Simulation in Virtual Reality – Master's Thesis 2026 – Present

- Translate HCI and human-factors requirements into an ongoing Unity/C# experimental platform comparing stationary VR, YawVR, a room-scale VAMPIRE Chair setup, and a real-car reference condition.
- Integrate vehicle-motion simulation, hardware and software components, user-facing secondary tasks, structured questionnaires, and behavioral data logging.
- Debug and tune real-time VR, motion-cueing, interaction, and experimental-workflow components for a within-subject study; participant results are not yet available.

Trust Calibration and Adaptive Visualization in Automated Driving 2025 – Present

- Developed a Unity-based experimental application for evaluating trust, mental demand, and user perception in automated-driving scenarios.
- Integrated questionnaire feedback and adaptive visualization concepts into a structured 2×2 within-subject study completed by 24 participants.
- Public study page: Visualization of Automated Vehicle Functionalities.

Assessing Cognitive Load in Immersive Environments 2025

- Synthesized subjective, physiological, and behavioral cognitive-load measures for immersive systems and produced a research report connecting measurement choices with user-study design.

Education

MSc Cognitive Systems Oct 2023 – Present
Ulm University, Germany

- Focus: Human-Computer Interaction, interaction design, cognitive systems, neurotechnology, immersive simulation, and human-centered intelligent systems.

BSc (Hons) Software Engineering Mar 2018 – Jul 2021
University of Plymouth, United Kingdom

- Second Class Honours, Upper Division.

Technical Skills

Front-end: HTML, CSS, JavaScript, TypeScript, jQuery, Bootstrap.

Interactive systems: Unity, C#, VR/XR prototyping, real-time interaction, experimental-system integration.

Research and UX: User research, usability evaluation, interaction design, prototyping, accessibility, experimental design, questionnaire-based evaluation.

Design: Figma, Adobe XD, wireframing, interface prototyping, information architecture.

Data and scripting: Python, SQL, data preprocessing and cleaning, CSV/Excel workflows, structured data collection.

Platforms and tools: TYPO3, WordPress, Git, GitHub, VS Code, Hotjar, GA4, Pardot.

Additional Recognition and Languages

Recognition: National Rank 39 in Arts Stream, GCE Advanced Level Examination, Sri Lanka (2015).

Languages: English – Fluent; Sinhala – Native.
